PROFESSIONAL SUMMARY

Aspiring Web Developer with hands-on experience building responsive, user-friendly web applications utilizing modern frontend and backend technologies. Proven ability to develop full-stack applications integrating React JS, Flask, and MySQL. Passionate about continuous learning, clean code practices, and contributing effectively to collaborative development environments.

EDUCATION

Master of Science (M.Sc.) in Computer Science

St. John's College, Palayamkottai, Tirunelveli

Expected Graduation: 2028

Bachelor of Science (B.Sc.) in Computer Science

St. John's College, Palayamkottai, Tirunelveli

Graduated: 2026

TECHNICAL SKILLS

Core Languages: Python, Java, JavaScript

Frontend: HTML5, CSS3, React JS

Backend Frameworks: Flask (Python)

Database: MySQL

ACADEMIC PROJECTS

Instagram Clone

React JS, HTML, CSS, JavaScript, Axios, JSON Server

- Developed a dynamic, fully responsive web application replicating core workflows of Instagram.
- Implemented complex social features including real-time-like simulations, dynamic comment addition, profile updates, follower tracking, stories interface, and personalized user suggestions feed.
- Utilized Axios client along with an asynchronous JSON Server backend environment to handle structured CRUD data flows effectively.

E-Commerce Mobile Shopping Web Application

HTML, CSS, JavaScript, Flask, MySQL

- Designed and engineered a mobile-responsive e-commerce application optimize for fluid cross-device user experiences.
- Built essential commercial layers including product inventory catalogs, interactive shopping cart states, and persistent user purchase histories.
- Developed backend session architectures enabling secure user authentication and relational database driven order lifecycle workflows using Flask and MySQL.

Tourism Management System

HTML, CSS, JavaScript, Flask, MySQL

- Created an administrative travel booking application tailored for managing custom vacation packages, itineraries, and tourist spots.
- Engineered clean relational database schemas inside MySQL to safely isolate user credentials, operational logs, and multi-tier booking matrices.
- Integrated functional internal application routing with Flask to handle customer checkouts and streamline administrative reservations.
